

EUROCITIES

The Network of Major European Cities

A sustainable Europe needs sustainable cities
Work with us!

Priorities for our cities:

- **Climate change and energy:** adaptation to climate change/ targets for renewable energies use
- **Health:** use of environmental and health impact assessments
- **Social exclusion, demography and migration:** urban strand in the European Integration Fund
- **Management of natural resources:** responsible consumption and procurement
- **Transport:** sustainable solutions for accessibility and public transport
- **Global poverty and development challenges:** promoting sustainable development in the European Neighbourhood Policy

How can the Sustainable Development Strategy help create sustainable cities?

- By developing clear objectives for sustainable development
- By promoting consultation with the key stakeholders
- By targeting environmental priorities for sustainability
- By integrating environmental considerations into all EU policies
- By improving coordination of European-national-local strategies
- By including an assessment of the strategy's implementation at the local level
- By encouraging sustainability impact assessments
- By launching awareness-raising campaigns involving Europe's cities
