RESPONDER links sustainable consumption and growth debates. The project aims at promoting sustainable consumption by assessing potential contradictions with economic growth - taking into account aspects of green growth, non-growth and de-growth.

RESPONDER explores novel ways of knowledge brokerage. Mutual understanding requires a systemic approach: RESPONDER will carry out participatory system mapping in a series of EU dialogues and multinational knowledge brokerage events. This website will support a structured dialogue between these events.

RESPONDER links four communities: science, policy, pro-growth and beyond growth: Whether you are a policy maker, a researcher, a CSO or business representative, getting involved in RESPONDER will help you expand your existing networks, provide you with cutting edge research results and achieve greater public visibility.
