Transitionsphase – 2016/17
- Aufbau von Monitoring- und Reporting
- Verankerung der SDGs in den Politiken der Schweiz

Langfristig – ab 2018
- Regelmässiger Review Zyklus
- Erarbeitung der SNE 2020-24 und SDG Report

Implementing the 2030 Agenda in Switzerland
Daniel Dubas, Head of Sustainable Development Section | ESDN Conference, Luxembourg 8-9 October 2015
The renewed Sustainable Development Strategy (January 2016)

- Sustainable Development Strategy as the common roof for the coordination of the implementation of the 2030 Agenda
- National Action Plan (9 policy fields)
  - Visions (long term)
  - Challenges
  - Goals (2030)
  - Actions (legislative period)
- International chapter: major foreign policy contributions for the implementation of the 2030 Agenda
The long-term view

- The vision defines the long-term perspective
- The goals define priorities for the next generation
- The actions define the priorities for the next legislative period
Transition phase (2016-2017)

- Baseline assessment / gap analysis (in sectoral policies)
- Define monitoring and review mechanisms
- Clarify stakeholder involvement (national and international focus)
- Build a stable policy cycle for the next 15 years
- Government decision on the concrete implementation of the 2030 Agenda in 2018
Key challenges in the implementation phase

• Better coordination between domestic and foreign policy
• Focus on the cross-sectoral aspects
• Convincing ministries of the importance of the new agenda
• Work on partnerships for the implementation
• Effective stakeholder participation and exchange with academia
• Implementation at the sub-national level
• Build on existing institutions and instruments
• Use synergies between national and international monitoring and reporting
