Role of Civil Society Organisations in the implementation of SDGs: making multi-stakeholder partnerships successful

Sascha Gabizon
WECF International
Women’s Major Group
Key principles CSO participation

- **Self-organisation of civil society** – *not represented by others, not organised by others*
- **Independent and critical** civil society – *allow watchdog role, do not ‘muzzle’*
- **Full diversity of civil society** – *not only the wealthier international CSOs*
- **Not just symbolic** – *no ‘participation-washing’*
Major Groups - Rio 1992

- Business & Industry
- Children & Youth
- Farmers
- Indigenous Peoples
- Local Authorities
- Scientific & Technological Community
- Women
- Workers & Trade Unions
- Non-Governmental Organizations
- Women
Women

Introduction

The Women’s Major Group was created at the Earth Summit in Rio de Janeiro, Brazil in 1992, where governments recognized Women as one of the nine important groups in society to achieve sustainable development. Since 1992, the Women’s Major Group has been recognized by the United Nations in the UN processes on Sustainable Development and since 1996 in the processes of the United Nations Environment Program.

The Women’s Major Group takes responsibility for facilitating women’s civil society input into the policy space provided by the United Nations (participation, speaking, submission of proposals, access to documents).

The WMG is self-organised and open to all interested organisations working to promote human rights based sustainable development with a focus on women’s human rights, women’s empowerment and
Sustainable Development: The role of the Women's Major Group is to assure effective public participation of women's non-governmental groups in the UN policy processes on Sustainable Development, Post2015 and Environmental matters.
New regional CSO groups
Each Goal has thematic constituency

E.g. **Goal 14: Local level Fisherfolk**
7 Oct 2015: Creation of the Latin America Union of Fisherfolks, from 10 national fisherfolks organizations

A Partnership by (a part of) the UN with a private organisation “project everyone” - UN signed away copyright for the SDG icons “allowing abusive use (mercandising) of SDGs by a profit making UK company”
Women’s Major Group

To attention of USGs Ms Amina Mohammed and Mr Thomas Gass
Copied: Co-Facilitators Kamau and Donoghue, Member States, UN agencies
Re: Concern regarding Images to present 2030 Agenda and SDGs to the world

23 September 2015, New York

Honourable USGs Ms Amina Mohammed and Mr Thomas Gass,

The Women’s Major Group, bringing together over 600 national and international women’s CSOs, continues to be actively engaged in the 2030 Agenda for Sustainable Development. We want to contribute to the success of the 2030 Agenda, and the implementation of the Sustainable Development Goals in all countries, and help achieve real transformative change towards gender equality, human rights, and responsible and equitable stewardship of the earth’s climate and natural resources. As always, please accept our proposals below in that sense of a constructive contribution by the women’s organisations.

**Overall concern:** Although it is good that many different people have become engaged in spreading the word about the 2030 Agenda and the 17 SDGs, we call on leadership from the UN to avoid trivialization and over-simplification in the main messages to the public. We need to maintain integrity and forward momentum of the SDGs in substance and scope in all messages coming from the UN.

**Concern 1: Maintain “sustainable development”**

The latest proposals for the outreach of the 17 Sustainable Development Goals now speak only of “the Global Goals”. Although we appreciate the effort to bring in melody and alliteration, we entirely disapprove of dropping “Sustainable Development”. It has been a key achievement of the global development agenda to ensure we are not seen as less than we are, or typecast as ‘less than” with no sense of the term sustainable development.
Corruption allegations

Former UN official faces $1.2m bribery charges

GINA CHON — WASHINGTON

Former UN General Assembly president John Ashe has been charged with receiving about $1.2m in bribes from a property developer in Macau and others in connection with a business exchange for promoting their interests at the UN.

From at least 2011 to December 2014, Macau real estate developer Ng Lap Seng, his assistant Jeff Yin and three other business executives have been accused of paying Mr Ashe to help their projects in Macau and Antigua, according to the complaint.

Mr Ashe, who has been arrested, was the deputy permanent representative to the UN for the Dominican Republic since 2004, was also arrested and accused of being a part of the bribery scheme as an agent for Mr Ng. The property developer is chairman of the Sun Kian Ip Group and is a businessman in Macau.

Held: John Ashe, who represented Antigua, is said to have taken bribes from a Macau property mogul.

Around 2009, Mr Ng formed a New York-based non-governmental organisation and made Mr Lorenzo an honorary president, for which he was paid a $20,000 monthly salary, the complaint said. A total of $12m was wired from Macau to the NGO’s bank accounts and additional payments were made to a company in the Dominican Republic where a sibling of Mr Lorenzo is a general manager.

Last month, Messrs Ng and Yin were arrested for allegedly lying to US customs officials about why they had brought in more than $4.5m in cash since 2013.

Mr Yin often travelled to the US with large sums, such as in March 2014, when he arrived at John F Kennedy airport, New York, with Mr Ng and $500,000 in cash, said the complaint.

One of the biggest payments allegedly made to Mr Ashe was $500,000 from Mr Ng, who wanted to build a multibillion-dollar UN-sponsored conference centre in Macau, according to the complaint. On February 24, 2012, Mr Ashe introduced a document at the UN in support of a project being developed by Mr Ng.

Mr Ashe could not be reached for comment and it is unclear who is representing the accused men. The UN and lawyers for Messrs Ng and Yin did not immediately respond to a request for comment.

Mr Lorenzo’s attorney said his client acted in good faith at all times and trusted the individuals with whom he was involved.
Lobby of the powerful
(Oxfam 2014 report on the 1%)

- Elite groups mobilise their vast resources to ensure global rules are favourable towards their interests.
- 20% of billionaires have interests in the financial and insurance sectors. These sectors spent $550m lobbying policy makers in Washington and Brussels during 2013.
- Billionaires of the pharmaceutical and healthcare sectors saw their collective net worth increase by 47%. During 2013, they spent more than $500m lobbying policy makers in Washington and Brussels.
Needed: criteria for engaging private sector in implementing SDGs

- Learn from WHO framework for “engagement with non-state actors”
- Legal and ethical regulation to ensure integrity, independence, public confidence
- ... ‘white washing’ of image unsustainable businesses
- Distinguish clearly between business actors and Civil Society Actors
- Starting point ‘Bali Guiding Principles on Partnerships for Sustainable Development
- Set up intergovernmental Framework for partnership accountability
- At EU level working on this, e.g. moving away from single chief scientific advisor ...
Margaret Chan on the growing influence of vested interests

“The influence of stakeholders, especially the private sector, in multiple sectors is growing very rapidly at a time when the institutional and regulatory capacity of many countries remains weak.

In the absence of adequate legislation, human and regulatory capacity, the private sector takes on an enlarged role, with little control by the government over the quality and costs of the services being provided. The vital role of government in protecting the public interest is diminished.

In one especially alarming trend, provisions for the settlement of investor-state disputes are being used to handcuff governments and restrict their policy space. For example, tobacco companies are suing governments for lost profits when national legislation, aimed at protecting health, interferes with their business interests.

When private economic operators have more say over domestic affairs than the policies of a sovereign government, we need to be concerned.

If multisectoral collaboration and multi-stakeholder engagement are the reality for sustainable development in the post-2015 era, we need to debate what type of mechanisms are required to allow all stakeholders to make contributions and to protect against the influence of vested interest. We also need to consider the UN’s role as an honest broker that promotes fair play.”
Who wants change?

Who wants to change?
Financial resources required for SDGs

- Energy efficiency
- Land and agriculture
- Infrastructure (non energy)
- MDGS

Annual investment requirements (billion US$ per year)

Source: UNTT Background Paper 1, x-axis in logarithmic scale

Source: ICESDF report 2014 Intergovernmental Committee of Experts on Sustainable Development Financing
Change energy consumption patterns phase out fossil fuel and nuclear subsidies while ensuring safe access for all

5 300 000 000 000 $/ year

100 Mrd $ climate fund = the money spend each and every week on energy subsidies

604 000 000 $/ hour

Any negotiation at the COP 21 on that?
An example: the German Energiewende:

- In 2014:
  - More than 30% of electricity from renewable sources (3% in 1990).
  - More than 1000 energy cooperatives.
  - More than 50% of the currently installed capacity (73 GW) are civic energy installations.

Ownership distribution of installed renewable electricity generation capacity in Germany (2012).

Source: Lutz Ribbe, EESC, 2015
Example Energy Transition Georgia
50% rural population still use fuelwood

Wood consumption in the energy mix (in kWh) (municipalities without natural gas supply)

- Wood
- Other fuels (bottled gas, electricity)

Pie chart showing:
- Heating: 60%
- Water heating: 23%
- Cooking: 17%
- No gas connection: 23%
Example Energy Transition Uganda
Where should we focus?

- Under 5 mortality rates are higher by more than 50% for children in bottom income quintile (all developing countries)
- Women are up to 9 times more likely to be malnourished compared to women from top quintile
- Gender wage gaps remain wide (e.g. 10% of salary of men for job of equal value) and is widening in many countries
- 1 out of 6 women suffers (sexual) violence in her lifetime
- Women’s high burden of unpaid work – care, domestic, farming – (double that of men)

### Table: Time spent by women and men in paid and unpaid work around the world (minutes per day)

Social protection in case of unemployment

Figure 5.1 Existence of unemployment protection schemes by type of scheme, 2008–09
Social Protection Floors can be paid from e.g. Financial Transaction Taxes.
Institutionalize diverse CSO participation in SDG implementation

• Create own “spaces” for self-organised civil society (women, indigenous peoples, ...)
• Engage CSOs in development of national and local SDG implementation plans
• Support financially CSOs to monitor and do ‘shadow’ reporting
• Have strong criteria and rules regarding accountability and transparency (IATA)
• Have trust fund for Local Authorities
• Support social entrepreneurship and cooperatives, create fair playing field
Wunschzettel für eine nachhaltige und gerechte Welt!

Umsetzung nachhaltiger Entwicklungsziele auf kommunaler Ebene

1. Armut in jeder Form und überall beseitigen
2. Den Hunger beseitigen, Ernährungssicherheit und eine bessere Ernährung erreichen und eine nachhaltige Landwirtschaft fördern
3. Ein gesundes Leben für alle Menschen jeden Alters gewährleisten und ihr Wohlergehen fördern
4. Inklusive gerechte und hochwertige Bildung gewährleisten und Möglichkeiten des lebenslangen Lernens für alle fördern
5. Geschlechtergleichheit und Selbstbestimmung für alle Frauen und Mädchen erreichen
6. Verfügbarkeit und nachhaltige Bewirtschaftung von Wasser und Sanitärversorgung für alle gewährleisten
7. Zugang zu qualitativ hochwertigen, nutzbringenden, nachhaltigen und nachwachsenden Energien für alle sicherstellen
8. Erhalt von Lebensräumen, natürlichen Wachstumsraten, der menschlichen Gesundheit und dem Leben von Tieren und Pflanzen fördern
9. Eine belastbare Infrastruktur aufbauen, inklusive und nachhaltige Industrialisierung fördern und Innovationen unterstützen
10. Ungleichheit innerhalb von und zwischen Staaten verringern
11. Städte und Siedlungen inklusive, sicher, wohnungsfähig und nachhaltig machen
12. Für nachhaltigen Konsum und Produktionsmuster sorgen
13. Umgehend Maßnahmen zur Bekämpfung des Klimawandels und seiner Auswirkungen ergreifen
14. Ozeane, Meere und Meeresressourcen im Sinne einer nachhaltigen Entwicklung erhalten und nachhaltig nutzen
15. Landsysteme schützen, wiederherstellen und ihre nachhaltige Nutzung fördern
16. Friedliche und inklusive Gesellschaften im Sinne einer nachhaltigen Entwicklung fördern, allen Menschen Zugang zu Justiz ermöglichen und effektive, rechtsfähige und inklusive Institutionen auf allen Ebenen aufbauen
17. Umsetzungsräume bilden und die globale Partnerschaft für nachhaltige Entwicklung aufbauen

Der Universalitätsanspruch bedeutet, dass die SDGs für alle Länder gelten. Sie nehmen auch Deutschland in die Pflicht, bei Themen wie Ernährung, Einkommensarmut, Frauenrechte, Energie, Klima und Finanzen. Dazu sollen die internationalen SDGs in nationale und kommunale Ziele übersetzt werden. Neben der Unterstützung der SDGs durch Deutschlands Entwicklungszusammenarbeit kommt es auf die Umsetzung in Deutschland an, die Akzeptanz der Gesellschaft für die notwendigen Veränderungen erfordert.

- Wie können die SDGs auf kommunaler Ebene umgesetzt werden?
- Können im Rahmen der SDGs bestehende Nachhaltigkeitsstrategien auf regionaler Ebene aufgegriffen und verstärkt werden?
- Welche Akteure und welche föderalen Ebenen sind hier zu unterstützen?

WECF war maßgeblich an den Verhandlungen beteiligt. Wir werden Sie Mitte Oktober mit einer Publikation über die Ergebnisse des UN-Sondergipfels informieren und auch die Ergebnisse des Münchner Fachdialoges „SDGs – Der SDG-Prozess und seine Umsetzungsmöglichkeiten auf kommunaler Ebene“ darstellen.

WECF ist eine Nicht-Regierungsorganisation und leitet mit Anderen die Women’s Major Group (WMG) und ist von daher in die Prozesse für die UN Millenniumsziele und SDGs sowie den Klimawandel einbezogen.
End of the “Trickle Down” Myth

• MDG’s aimed at halving extreme poverty.
• MDG has not been achieved, except in China & India
• Despite progress in GDP, majority of population in developing countries have seen no progress
• **What did increase** is inequality: more rich people
Inequality – concentration of power

• The 85 richest individuals now have the same wealth as the bottom 50% of the world’s population (in 2010 were still 388 people)
• There is increasing evidence from the e.g. International Monetary Fund, that extreme inequality is not just bad news for those at the bottom but also damages economic growth.

Figure 3: Wealth of the 80 richest people in the world has doubled in nominal terms between 2009 and 2014, while the wealth of the bottom 50% is lower in 2014 than it was in 2009.

What 30 Years Of “Trickle Down” Policies Have Produced

According to a new report by Oxfam, the richest 85 people in the world control more wealth than the poorest 3.5 billion

“It is staggering that in the 21st Century, half of the world’s population -- that’s three and a half billion people -- own no more than a tiny elite whose numbers could all fit comfortably on a double-decker bus.” — Oxfam Executive Director Winnie Byanyima
Few rich men...
Intra and inter-Country Inequality, 2007

Cuts in budget expenditures
Equitable sharing

IF THESE IDIOTS WOULD JUST TAKE THE BUS, I COULD BE HOME BY NOW

1960-2008
- Ecological Footprint

2008-2050, Scenarios
- Moderate business-as-usual
- Rapid reduction

y-axis: number of planet earths, x-axis: years
What works to reduce inequalities?

• **Social protection floors**
  – Minimum income guarantee
  – Universal, free public services, health, education, housing, water
    example Brazil 50 million people out of poverty in Lula’s presidency period

• Share the tax burden fairly, **shifting taxation** from labour and consumption towards capital and wealth
  – Introduce financial transaction taxes a.o.

• Introduce **minimum wages and ensure a living wage** for all workers

• Introduce **equal pay** legislation and promote economic policies to give women a fair deal

• Reduce and redistribute **women’s burden of unpaid work**

• **Stop tax dodging** by corporations and rich individuals

• Debt restructuring and relief !!
Financing For Development

• Focus on Systemic Issues
• Should establish fair rules and democratic multilateral governance on:
  – Tax, financial and monetary policies
  – Debt relief and restucturing
  – Trade
  – Investment
Domestic and International sources

Figure 3: Development finance in developing countries and Least Developed Countries

Sources and scope of intl dev.funds

Figure 4: Financing flows to Developing Countries (left) and Least Developed Countries (right), in billions of US$

Source: OECD DAC Stats, World Bank Migration and Remittances Data

Intergovernmental Committee of Experts on Sustainable Development Financing, 8 August 2014
https://sustainabledevelopment.un.org/content/documents/4588FINAL%20REPORT%20ICESDF.pdf
Foreign Direct Investment (to DAC)

FDI in developing countries has grown an average of 11.7% a year since 1990.

US$ billions, 1990–2011

ca. 500 billion; factor 5 higher than ODA
Foreign direct investment (FDI) and official development assistance (ODA) to Africa have been rising steadily over the past decade, with oil producing countries receiving a greater proportion of this investment.

Out of Africa...

• Illicit financial flows from developing countries in the year 2012— est. US$ 991.2 billion
• Between 2003 – 2013 total US$6.6 trillion
• Illicit outflow increased at an staggering average rate of 9.4 percent per year—roughly twice as fast as global GDP.
• Africa: ca.50 billion p/yr just from tax evasion and undervaluing by commercial companies

Wrong policies?

• Increasing VAT on basic goods is main measure to raise domestic revenue
• Tax paradise is a good development model
• Austerity measures are necessary path
• Invest in export zones, not rural areas
• Trade agreements and investor protection clauses are main growth path
Dysfunctional global financial system

UNWOMEN:

Support concerted efforts by all stakeholders to transform the global economic and financial architecture by addressing the structural causes and consequences of gender inequality. An under-regulated global economic and financial system has widened income, gender, and geographic inequalities, and produced systemic crises - food, fuel and financial - that have disproportionately affected the livelihoods and wellbeing of women and girls. Austerity measures to manage the crises have resulted in significant cutbacks in essential public services, placing increased demands on women’s unpaid care work to fill the gaps. A global and stable economic and financial system is one that rests not on generating wealth alone but on its redistribution to address inequalities.

Redistribution not Austerity!
Progressive tax systems

UNWOMEN:

Ensure an enabling policy, regulatory and institutional environment for gender equality and women’s empowerment. States are responsible for putting in place non-discriminatory and gender-responsive laws, institutions, and planning and budgeting systems and processes. States must also promote economic policies, both fiscal and monetary, that mobilize domestic resources by implementing progressive tax systems that fully integrate gender equality objectives and shift the tax burden to groups with higher incomes, especially corporations, the financial sector and extractive industries.

• shifting burden away from poor & women to corporations, especially financial and extractive sectors !!
Social Protection & Unpaid care work

UNWOMEN:

Enable women’s full and equal participation in the economy. States must promote policies that support the generation of decent work; reduce the gender wage gap; and recognize, reduce and redistribute care work as well as address the barriers women and women-owned businesses face in accessing financial services, new markets, investment, technology, skills and training. States should also prioritize investments in and ensure universal access to essential public services, including care services, social protection and infrastructure.

• Ensure social protection floors – specifically focussed on women (eg. Brazil)
• Bring back into FFD draft & 31 the ILO Convention 102, and the accompanying Recommendation 202 and as elaborated by the UN CESCR under General Comment 19
Add „Gender Responsive Budgeting“
Regulate Private Sector to not harm

UNWOMEN:

Promote a socially-responsible and accountable private sector for gender equality and women’s empowerment. The private sector is an important actor, particularly in relation to job creation and infrastructure development. It must take full account of the gender implications of its investments as well as its own internal operations and support the UN Guiding Principles on Business and Human Rights as well as the Women’s Empowerment Principles that set expectations for business to promote gender equality and women’s empowerment in the workplace, market and community. States are also responsible for regulating the private sector to ensure that their actions are aligned with national development strategies and for holding private actors accountable to the same human rights and environmental standards as public actors.

• Regulate private sector to uphold Women human rights !
• Review all investor protection clauses, tax rulings, trade agreements!
• Social, Environmental and Women rights safe guards !
Global Partnership & reform Int‘l Trade

UNWOMEN:

Eradicate global inequalities and power imbalances through a renewed global partnership for sustainable development. Global economic governance institutions must become more democratic in terms of developing country representation and gender balance. In addition, global trade, debt, finance and investment structures and agreements must undergo gender, human rights, and environmental impact assessments to ensure that they contribute to eliminating poverty and inequality within and between countries; promoting gender equality and women’s empowerment; and enforcing core labor standards. In addition, a multilateral legal framework for sovereign debt restructuring processes as mandated by A/Res/68/304 should be established to safeguard women and the poor from any disproportionate impacts of debt restructuring.

• Gender Equality and Women’s human rights
• Safeguards for all trade and investor agreements!
• Implement UN Debt relief and restructuring measures
• Create intergovernmental UN Tax coordination body
ODA to Gender Equality/Women rights

UNWOMEN:

Increase and commit to clear contributions to gender equality and women’s empowerment in official development assistance (ODA). ODA must continue to be a dynamic driver for advancing gender equality and women’s empowerment globally. To enhance and maximize the quality of gender equality-focused ODA, it should be targeted and mainstreamed across all sectors, not only in health and education but also in agriculture, water and sanitation, transport and energy. Donors must commit to clear allocations for gender equality and women’s empowerment and ODA should be systematically screened against the DAC Gender Equality Creditor Reporting System to enable States to track these allocations and to take action on closing resource gaps in underfunded areas.

- Gender criteria and budget allocation for all ODA funds!
- Specific dedicated women’s rights funds but NOT via the World Bank!
Space and Funds for Women‘s Organisations

UNWOMEN:

Adequately resource women’s organizations at local, national, regional and global level. Women’s organizations play a key role in demanding accountability of all stakeholders for the full implementation of and compliance to international norms and standards on gender equality and women’s empowerment. Decisions on public spending and priority setting should be participatory and inclusive with adequate space and resources for women’s organizations to participate and influence outcomes. Women’s organizations must also be able to meaningfully participate in the design, implementation and monitoring of the post-2015 development agenda.

Add to FFD:

- „Dedicated“ funding for civil society women‘s rights organisations (not blended with private sector!)
- Observer seat for Women’s organisations in negotiations
on Tax ...

• **Progressive Tax Systems**... (para 22) Good!
• redouble efforts to substantially reduce illicit financial flows by 2030, -- too weak!
• **all companies, incl. multinationals, pay taxes** to the governments of countries **where economic activity** occurs and value is created (para 23) – good!
• “strengthened” **United Nations Committee of Experts on International Cooperation in Tax Matters** (para 29)– too weak, asking for inter-governmental body!
On Technology...

• "Technology Facilitation Mechanism” (para 123 ) a space to deliberate on technologies and their potential impacts that are relevant to the fulfilment of the SDGs.

• Importance of “traditional and indigenous knowledge and innovations” their role is invaluable in enabling communities to address development and climate change challenges.

Missing: reference to the gender gap in technology. Need measures to include women in design of sustainable technologies
Thank you
