EIB’s response to the challenge: An increased ambition

The lending arm of the European Union since 1958.

Support €1 trillion of climate and environment investments over the coming decade.

One of the largest providers of climate finance, with €19.3 billion climate lending in 2019.

Aligned with Paris agreement by end of 2020.

The biggest multilateral financial institution in the world, with €63.3bn lending in 2019.

50% of EIB lending dedicated to climate and environment by 2025.

Support €1 trillion of climate and environment investments over the coming decade.
EIB’s Goal: Reaching net-zero emissions by 2050

-55% in 2030
(EC, September 2020)
Global challenge, multiple interlinked solutions
Conclusion

• The climate and environmental crisis requires an immediate answer.

• Considering that all ecosystems are interlinked, we need to answer in an integrated way.

• Given the immense scope of the crisis, addressing the challenge requires strong partnerships between governments, organisations, cities, financial institutions and the private sector.
