1. Context : the federal strategy for SD

- 1997 : SD strategy 4 years federal plans in a “plan-do-check-act” model
- 2005 : National Strategy for SD : orientation of actions from public authorities with a common long term vision (process established)
- 2005- 2007 : Reports for SD (Federal Planning Bureau) : list of sustainable development goals inspired by international commitments
- 2005 : Audit of the Court of Audit on the federal strategy : at the margin, without long term perspectives, etc.
- 2006 : scientific study – panel of experts – conference
- 2010 : Revised Act for SD introducing LTV
- 2013 : Adoption of the LTV by a Royal Decree

2

Process

2. Process: long term vision for SD

2.1. Responsibilities

- Impulse of the member of the government in charge for SD
- Coordination by the federal administration for SD
- Cooperation with other federal bodies for SD (ICSD, TFSD-FPB, FCSD) in a steering group
- Relations with a dedicated parliamentary commission for SD and Climate Change (Opening conference in Parliament 06/2011, follow-up)

2. Process: long term vision for SD

2.2. Process

- 05-06/2012 : Each federal body prepared its own input.
 - ICSD : working group experts from federal public services
 - TFSD-FPB : proposal with panel of scientific experts
 - FCSD : short common opinion issued + position from 4 major groups
 - Civil society
- 07/2012 : Parliamentary Commission issued a Resolution
- 07/2012 : Rio+20 outcome
- 09/2012 – 05/2013 : political deliberations (negotiations on each objectives, feed back Parliament
02/2013 - Royal Decree)

3

**Belgium we want
in 2050**

Four starting points for an ideal society

An inclusive society
characterised by
solidarity

A resilient society which adapts its economy to social challenges

A society that protects
its environment

A society that is supported by government authorities which assume their social responsibility

4 challenges

15 themes

55 objectives and indicators

4

Implementation :

It moves

4. Implementation

4.1. Federal Strategy

- Framework of action for federal SD bodies
- Federal plan in preparation : first steps “short term”
- Monitoring : indicators
- Quid concerning intermediary steps
- Regulatory Impact Assessment (former SIA)

4.2. Contribution by federal public services through their own management plan

4.3. Partnerships

- How to stimulate commitments from civil society towards long term goals ?
- Role of public authorities ?
