The national strategy of ecological transition towards sustainable development

Transformative environmental and sustainability policy: new thematic issues, actor constellations and governance modes

11th ESDN Workshop
Berlin, 26th June 2014

Stéphane Bernaudon

Office of the Commissioner general for sustainable development
France conducted 2 NSDS's before

The elaboration of the new strategy 2014-2020, started in early 2013 at the ministry level.
The first Strategy covered the period 2003-2008

In 2006, it was brought in line with the revised European SDS (EUSDS) ’s key-challenges and objectives
It brought the creation of interministerial coordination

Since 2007, the function has been attached to the Office of the Commissionner General for SD
The second Strategy, for the period 2010-2013, «towards a green and fair economy»
7+2 “sectorial” key-challenges

7 EU SDS key-challenges + 2 : Governance and knowledge society
2012 Sept : opening of the first Conférence environnementale
The ecological transition
Towards sustainable development

A path towards SD, coupling **technological and social innovations**
The ecological transition
