

Recommendations for the design of strategic transformative processes

- ‡ Requirement of an encompassing strategy process
- ‡ Cross-sectional issues should be identified in the first
- ‡ Using long term visions and objectives is crucial
- ‡ The complexity of these processes must be assessed realistically
- ‡ support experiments

Designing transformative processes – Options and choices

visions only ←-----→ visions and implementation

disciplinary ←-----→ interdisciplinary

theoretical ←-----→ practical, transdisciplinary

rigid framework ←-----→ experiments

few resources ←-----→ fine resources

knowledge & skills

Ideas for sustainable development strategies - content

- ❖ Need to discuss long-term visions and concrete scenarios
- ❖ Need to identify transformative issues
- ❖ Need to identify dynamic areas
- ❖ Need to focus on government, management and governance mechanisms
- ❖ Need of management rules which allow to capture goals etc. across department boundaries and legislative periods
- ❖ Need for re-evaluation of existing instruments (to reach societal actors)
- ❖ Need to create designs for „open spaces“
